NUMBER 1

	i	Editorial
Mauro Benati and **Giacomo Caviglia**	1	Conservation laws for 3-dimensional compressible Euler equations
A. I. Murdoch and **A. Morro**	9	On the continuum theory of mixtures: motivation from discrete considerations
K. Vajravelu	27	Hydromagnetic convection at a heated semi-infinite vertical plate
L. S. D. Morley	37	"Practical" components of vectors and tensors
D. S. Chandrasekharaiah	55	Variational and reciprocal principles in micropolar thermoelasticity
J. M. Golden and **G. A. C. Graham**	65	The transient quasi-static plane viscoelastic moving load problem
Eric Tassilly	85	Propagation of bending waves in a periodic beam
G. M. Kremer	95	Extended thermodynamics of mixtures of ideal gases
M. E. Erguven	117	A fundamental solution for transversely isotropic and nonhomogeneous media
S. J. Fariborz	123	Singular integral equations with Cauchy kernel on the half-line
N. C. Maiti	127	Note on problem of spherical cavity in an isotropic, micropolar, elastic medium
	I	Software Survey Section

NUMBER 2

S. C. Gupta	133	Heat transfer with solid liquid phase change initiating at a point in a semi infinite mold
Bogdan Maruszewski	145	Coupled evolution equations of deformable semiconductors
Arabinda Roy	155	Diffraction of elastic waves by an elliptic crack—II
A. M. Siddiqui and **P. N. Kaloni**	171	Plane steady flows of a third grade fluid

P. T. Than, F. Rosso and D. D. Joseph	189	Instability of Poiseuille flow of two immiscible liquids with different viscosities in a channel
D. S. Chandrasekharaiah	205	Effects of surface stresses and voids on Rayleigh waves in an elastic solid
Mehmet Rusen Gecit	213	Pull-off test for a cracked layer bonded to a rigid foundation
H. Ramkissoon	227	The effect of a boundary on the motion of a sphere in polar fluids
G. C. W. Sabin	235	The impact of a rigid axisymmetric indentor on a viscoelastic half-space
L. S. D. Morley	253	Tensor calculus of locally Cartesian coordinates on a curved surface
	I	Software Survey Section
	IV	Announcement

NUMBER 3

R. A. Meriç	265	Sensitivity analysis for a general performance criterion in micropolar thermoelasticity
J. M. Golden and **G. A. C. Graham**	277	The steady-state plane normal viscoelastic contact problem
K. Viswanathan and **U. Sharma**	293	Stress concentration due to a rigid ribbon in the presence of a crack—I. SH case
J. L. Auriault and **G. Bonnet**	307	Surface effects in composite materials: two simple examples
R. S. Agarwal and **C. Dhanapal**	325	Numerical solution to the flow of a micropolar fluid between porous walls of different permeability
Adabala Ramachandra Rao and **Sethupathy R. Kasiviswanathan**	337	On exact solutions of the unsteady Navier-Stokes equations—the vortex with instantaneous curvilinear axis
John S. Walker	351	Liquid metal MHD flow in a duct whose cross section changes from a rectangle to a trapezoid
D. B. Ingham and **I. Pop**	373	Darcian free convective flow about an impermeable horizontal surface bounded by a vertical wall
	I	Software Survey Section

NUMBER 4

S. Burhanettin Altan	385	On positive definiteness of strain energy in nonlocal elasticity
Dominic G. B. Edelen	395	Global solutions to problems in the classic theory of static dislocations
Sitiro Minagawa and **Takashi Oshiro**	405	Dislocation dynamics in an isotropic, paramagnetic and electrically conducting solid in a large magnetic field
H. S. Paul and **R. Narasimhan**	413	Magnetothermoelastic stress waves in a circular cylinder
Chuen-Yuan Chia	427	Nonlinear vibration and postbuckling of unsymmetrically laminated imperfect shallow cylindrical panels with mixed boundary conditions resting on elastic foundation
Adabala Ramachandra Rao and **Sethupathy R. Kasiviswanathan**	443	A class of exact solutions for the flow of a micropolar fluid
Christian Constanda	455	Uniqueness in the theory of bending of elastic plates
Jagan Nath Sharma	463	Transient generalized thermoelastic waves in transversely isotropic medium with a cylindrical hole
M. Ravid, S. R. Bodner and **I. Holcman**	473	Analysis of very high speed impact
	I	Software Survey Section

NUMBER 5

Czesław Woźniak	483	A nonstandard method of modelling of thermoelastic periodic composites
S. S. Chawla and **A. R. Verma**	499	Oscillatory free convection from a disk rotating in a vertical plane
C. Atkinson	511	Steady pore pressure profiles surrounding an advancing well bore
S. K. Lakshmana Rao, T. K. Y. Iyengar and **K. Venkatapathi Raju**	531	The rectilinear oscillations of an elliptic cylinder in incompressible micropolar fluid
S. J. Matysiak and **Cz. Woźniak**	549	Micromorphic effects in a modelling of periodic multilayered elastic composites
S.-J. Chang and **T. Mura**	561	Inclined pileup of screw dislocations at the crack tip with a dislocation-free zone
J. D. Pos, F. A. Kilner and **P. G. Fischer**	577	Combined refraction-diffraction of water waves by an island

D. S. Chandrasekharaiah 591 Plane waves in a rotating elastic solid with voids

Clement Kleinstreuer and Shailesh S. Agarwal 597 Fluid dynamics of a tubular polymerizer

O. Coussy 609 A moving crack problem along the interface of two viscoelastic media

621 Announcement

I Software Survey Section

NUMBER 6

J. M. Bass and J. T. Oden 623 Adaptive finite element methods for a class of evolution problems in viscoplasticity

Patrick Laborde 655 Analysis of the strain-stress relation in plasticity with non-associated laws

Michael H. Bessendorf 667 Stochastic and fractal analysis of fracture trajectories

M. Matsikoudi-Iliopoulou 673 Finite axisymmetric deformations with torsion of an initially cylindrical membrane reinforced with one family inextensible cords

S. R. Wu and J. T. Oden 681 A note on some mathematical studies on elastohydrodynamic lubrication

M. Berveiller, O. Fassi-Fehri and A. Hihi 691 The problem of two plastic and heterogeneous inclusions in an anisotropic medium

Y. H. Xu, M. M. Smith and G. F. Smith 711 Computer aided generation of anisotropic constitutive expressions

R. Bouc and M. Defilippi 723 A Galerkin multiharmonic procedure for nonlinear multi-dimensional random vibration

K. S. Parihar and S. Lalitha 735 Cracks located on a single line in an orthotropic elastic medium in which body forces are acting

Letters in Applied and Engineering Sciences

R. E. Craine 755 A continuous dependence result for one-dimensional nonlinear dielectrics

M. T. Kamel 759 Flow of a micropolar fluid in a diverging channel

I Software Survey Section

NUMBER 7

P. P. Prokhorenko, N. P. Migun and S. V. Grebenshchikov	769	Experimental studies of polar indicator liquids used in capillary penetrant testing
Fue-Sang Lien and Cha'o-Kuang Chen	775	Mixed convection of micropolar fluid about a sphere with blowing and suction
F. Falk and R. Seibel	785	Domain walls and transverse shock waves in shape-memory alloys
P. Kesari and B. K. Rajhans	797	Scattering of shear waves by a rigid cylinder in an inhomogeneous medium
Mehmet Rusen Gecit	807	Pull-off test for a cracked layer bonded to a rigid foundation
P. S. Theocaris and L. Petrou	821	The order of singularities and the stress intensity factors near corners of regular polygonal holes
John G. Papastavridis	833	Time-integral theorems for nonholonomic systems
Wen-Xue Wang, Yoshihiro Takao and Toshiro Suhara	855	A fiber-reinforced matrix containing a penny-shaped crack under mode III loading condition
John G. Papastavridis	871	The energetic/variational interpretation of Poincaré's criterion for the orbital stability of limit cycles of autonomous systems
A. I. Murdoch	883	On the relationship between balance relations for generalised continua and molecular behaviour
R. A. Meric	915	Dynamic sensitivity analysis of material and load parameters in nonlocal elasticity
M. Ortiz	923	A method of homogenization of elastic media
S. Rionero and S. Chirita	935	The Lagrange identity method in linear thermoelasticity
	I	Software Survey Section

NUMBER 8

Rama Subba Reddy Gorla and H. S. Takhar	949	Free convection boundary layer flow of a micropolar fluid past slender bodies
Z. P. Duan	963	On the duality principle of conservation laws in finite elastodynamics
J. Kapelewski, W. Nowacki, Cz. Rymarz and E. Włodarczyk	987	Review of S. Kaliski's scientific achievements in the domain of coupled fields

Santabrata Chakravarty	1003	Effects of stenosis on the flow-behaviour of blood in an artery
K. Fukuzaki and **S. Shioya**	1017	On the interaction between an edge dislocation and two circular inclusions in an infinite medium (continued report)
I. Christie, K. R. Rajagopal and **A. Z. Szeri**	1029	Flow of a non-Newtonian fluid between eccentric rotating cylinders
A. P. S. Selvadurai and **B. M. Singh**	1049	Axisymmetric problems for an externally cracked elastic solid. I. Effect of a penny-shaped crack
S. Pennisi and **M. Trovato**	1059	On the irreducibility of Professor G. F. Smith's representations for isotropic functions
J. R. Cannon and **Paul Duchateau**	1067	Design of an experiment for the determination of an unknown coefficient in a nonlinear conduction-diffusion equation
B. S. Berger and **M. Rokni**	1079	Lyapunov exponents and continuum kinematics
	1085	Announcement
	I	Software Survey Section

NUMBER 9

Remigio Russo	1087	Uniqueness in classical elastostatics
N. Daher and **G. A. Maugin**	1093	Deformable semiconductors with interfaces: basic continuum equations
R. C. Batra	1131	Steady-state penetration of viscoplastic targets
Alinur Büyükaksoy	1143	Influence of the impedance to the surface currents induced on a spherical cap by a ring source
Ioana Luca	1155	Singular surfaces in linear homogeneous isotropic thermo-viscoelastic materials of integral type
J. L. Nowinski	1165	Wave propagation in a circular rod made of an elastic diatomic material
M. B. Rubin	1175	An elastic–viscoplastic model exhibiting continuity of solid and fluid states
A. Avudainayagam and **B. Jothiram**	1193	No-slip images of certain line singularities in a circular cylinder
C. V. Massalas and **V. K. Kalpakidis**	1207	Thermoelastic waves in a waveguide

T. Bryant Moodie, D. W. Barclay and **R. J. Tait**	1219	Transient pulse interactions with model stenoses and aneurysms
Jacob Aboudi	1229	Closed form constitutive equations for metal matrix composites
	1241	Announcements
	I	Software Survey Section

NUMBER 10

Rama Subba Reddy Gorla and **Pottapu V. Reddy**	1243	Flow and heat transfer from a continuous surface in a parallel free stream of micropolar fluid
B. S. Berger and **M. Rokni**	1251	Lyapunov exponents and continuum kinematics
L. Demkowicz and **W. Rachowicz**	1259	On a characteristic finite element method for compressible gas dynamics
Vincent C. Prantil and **Paul R. Dawson**	1283	Comparison of a mixture formulation with a similarity solution for binary alloy solidification
R. W. Ogden	1305	On the stability of asymmetric deformations of a symmetrically-tensioned elastic sheet
O. P. Bhutani and **Surja Kumari**	1315	On waves in thermo-magneto-microelasticity
Dimitris C. Lagoudas	1323	Plane harmonic waves in the linearized gauge theory of dislocations
		Letters in Applied and Engineering Sciences
Sitiro Minagawa	1337	Nonlinear-eigenvalue problem for heat conduction in a one-dimensional coupled-thermoelastic layered composite
	I	Software Survey Section

NUMBER 11/12

	i	Readers celebrate the Silver Anniversary of the Journal
Zhijing Tang and **T. C. T. Ting**	1343	Wave curves for the Riemann problem of plane waves in isotropic elastic solids
B. N. Mandal and **Krishna Kundu**	1383	Ring source potentials in a fluid with an inertial surface in the presence of surface tension
Jagan Nath Sharma	1387	Some considerations on generalized thermoelasticity
B. S. Berger and **M. Rokni**	1393	Lyapunov exponents and the evolution of normals
K. L. Chowdhury and **E. S. Suhubi**	1397	On the conservation laws of the BBM equation

R. S. Agarwal and **C. Dhanapal**	1403	Numerical solution of micropolar fluid flow between a rotating and a porous stationary disc
S. R. Kasiviswanathan and **A. Ramachandra Rao**	1419	An unsteady flow due to eccentrically rotating porous disk and a fluid at infinity
Tribikram Kundu	1427	The transient response of two cracvks at the interface of a layered half space
M. V. Gandhi, K. R. Rajagopal and **A. S. Wineman**	1441	Some nonlinear diffusion problems within the context of the theory of interacting continua
F. Dell'Isola and **A. Romano**	1459	On the derivation of thermomechanical balance equations for continuous systems with a nonmaterial interface
F. Dell'Isola and **A. Romano**	1469	A phenomenological approach to phase transition in classical field theory
A. P. S. Selvadurai and **B. M. Singh**	1477	Axisymmetric problems for an externally cracked elastic solid—II. Effect of a penny-shaped inclusion
Yusuf Güusey	1491	Optical solitons through an anharmonic vibrational mode
Muhammad Aslam Noor	1497	Finite element analysis for a class of nonlinear variational inequalities
Prem Kumar, P. Sambeth Narayanan and **Sarbeswar Raut**	1503	Laminar boundary layers with vectored mass transfer
D. Ieşan	1511	Plane strain problems in piezoelectricity
Muhammad Aslam Noor and **Ahmed Kamel Khalifa**	1525	Cubic splines collocation methods for unilateral problems
H. G. Georgiadis	1531	Indentation of an orthotropic layer by a semi-infinite punch
		Letters in Applied and Engineering Sciences
C. V. Massalas	1535	A reciprocal theorem in generalized thermoelasticity proposed by Lord and Shulman (reformulation)
	I	Software Survey Section
